An Efficient Technique For Spreading Your Virus V2

By SkatinxLife @ www.hackforums.net

Introduction

This eBook will give you a unique way to spread your virus. By utilizing these techniques together, one can easily achieve 1,000 downloads per day. There are no pre-requisites, and all you need is a brain. Get ready to SE your way to 1,000 Downloads (or more) a day!

NOTE: I do not take ANY responsibilities for what you may/will do with the knowledge from this guide. The purpose of this guide is merely for educational purposes.

"The Method" # 1

Youtube is a great way to spread viruses, and we can leave our videos for people to see all around the world.. Even when we are sleeping! In this method we are going utilize a javascript, fake program, and some

unique methods of youtube promoting to get you the downloads you want.

Preparation

1. **Download CamTasia Studio. (***Check download links at the bottom of the eBook for full version of Camtasia 7***)**
2. **Open up your virus builder. (Example: Metus, XR, etc.) And build your server with proper details, and information. If your virus isn't already 100% FUD, crypt it. (***Check download links at the bottom of the eBook for a FUD Crypter***) NOTE: If your virus is NOT FUD (Fully Undiscoverable) you will not get very many executions.**
3. **Make a new paypal account, and make sure it is NOT verified. (Premier or Buisness)   Also make sure your balance is 0.00$**

Execution of *Method 1*

1. **Open up your Camtasia Screen Recorder. (make sure you are talking, and narrating through a mic. Worst case scenario, just add subtitles at the end of the video with Camtasia Studio)**
2. **Talk about what your video is about. (a PayPal money generator that works!) Make sure throughout this video you have a sincere, firm tone. (Makes the video subconsciously more believable.)**
3. **Open up your PayPal, and show the viewers you have 0.00 $. As well as:**
   - **The current date. (Last logged on as _____)**
   - **Current transactions**

4. **Now log out, and go to your paypal money generator. (***Check download links at the bottom of the eBook for a Fake PayPal program***)**

5. **Generate any amount (except for the highest amount of money) and tell the viewers not to use that one, seeing as it's a high risk of getting caught)**

6. **Now open up your browser again, and keep the recording going until right after the (Logging in..) flash screen.**

7. **You should now be at your PayPal homepage. Paste the following javascript into your URL Bar, and hit enter: javascript:document.body.contentEditable='true'; document.designMode='on'; void 0**

8. **You should notice some of the colors on the page change. This means the page is now editable (Dont get too excited everything goes away after a refresh :/)**

9. **Change your balance to the amount your generator is generating. (Ex. If your generator from step 4. Is giving you 1000$ then thats the amount you edit your balance to be)**

10. **After your done the edit, DONT REFRESH/LEAVE the page. Instead continue your recording. Be calm about it, and say how it works. Remember to show the date again, and how you still don't have any transactions. Right before you end the video, say:** *Oh yeah, by the way be careful, and don't use this more then once a month*

Editing your video

1. **Okay, open up your favourite Video Editing program. (I use Sony Vegas:** *Check the downloads section at the bottom of the eBook if you want it*) **Or if your a lamer open up the**

Camtasia Editor. Line up your videos, and trim any excess pauses and sloppiness.

2. **MAKE SURE to add background music, but make it very faint. The purpose of this is to only cover up the pauses/differences in sound. (from when you stop, and star the recording)**

3. **This video is meant to look like it was done in one whole shot.**

4. **Now this step is <u>important:</u> After editing your video, don't name it something like:** *OMG SPREADING VIDEO, Vid#1 etc.* **Instead name it with tags that people would search on youtube.** *How to hack paypal, Get free money from paypal etc.*

5. **The vaguer your tags are the better.**

6. **Now when YouTube asks you for Official Tags for the video. That's when you can put specific ones. What this does is balance out specific-vague.**

<u>Extra Video Promoting</u>

1. **Download Refresh Every, Mozilla Firefox, and a list of proxies (***Check Downloads Section at the bottom of the eBook for Download)*

2. **[Install Firefox if you don't already have it] Install Refresh Every (add-on) and add the list of proxies to it.**

3. **Visit your YouTube video, and keep execute Refresh Every. (The point of this is, the more views you get. The easier it is for anybody searching something similar to your tags to find it.)**

4. **Remember to post your video as video responses to other popular videos.**

5. Remember to include virus scans in your video information.

"The Method" # 2

MANY WAREZ-RELATED FORUMS ARE FILLED WITH NOOBS WHO ARE LOOKING TO DOWNLOAD AS MANY FREE ISOS/GAMES/MOVIES AS POSSIBLE. THIS IS WHEN WE EXPLOIT THEM!

1. **FUD your Virus. (***Check downloads sections at the bottom of the eBook for a FUD Crypter!***)**

2. **Change the icon to a .txt file using ResHacker. (***Check downloads section at the bottom of the eBook for ResHacker + tutorial!***) Now rename the virus to "**_README, README!, IMPORTANT_**" Or something along those lines.**

3. **Now go to a Warez website such as** www.pspiso.com**, and find a popular game or movie. (For Example: Bioshock 2)**

4. **Take all of the links, and go to** www.lix.in **and rename them. (enter URL + click Enter)**

5. **Upload your virus to the exact same host as the other links were from (Example: If the Bioshock 2 links were uploaded on Megaupload, then use Megaupload to upload your Virus)**

6. **Post on the same forum (or another one, it doesn't matter) the same game, but use the lix.in (Hidden) links instead.**

7. **Before all of the proper links, post the "Readme," with Huge, bold, underlined, colourful letters saying something like "**README!** IMPORTANT NOTES ON HOW TO INSTALL THE GAME!"**

THE END – THANKS FOR READING .. NOTE: V3 IS COMING OUT SOON!
